Von Duprin Exit Devices

TYPE 66 Rim

PAT. APP. FOR

The finest rim type devices available, Von Duprin 66 devices are designed for smart appearance, engineered and constructed for long, satisfactory service.

STAINLESS STEEL DEVICES (Finish US-32D)

—All external parts are fashioned of stainless steel, including the sex bolts, 1403J strike and 663 series outside trims. Cylinders, finish US-15 on bronze.

BRONZE DEVICES—All external parts are fashioned of bronze, including the sex bolts, strikes, outside trims and drop-forged lever arms.

ALL DEVICES—The master cam, latch bolt, backplate, thumbpiece lock tumbler and springs are stainless steel; the lock and hinge stile chassis and latch tailpiece are drop-forged bronze.

Every 66 device features easy, effortless crossbar action, reinforced crossbar, adjustable roller strike, 12-24 sex bolts for wood and kalamein doors, and rapid dogging—just a half turn of the key will dog the device . . . securely and rigidly.

Devices are *not* reversible—specify hand; LHR or RHR.

DIMENSIONS

Crossbar tubing 1" O.D.
Crossbar height from bottom of door . . . 37"
Crossbar projection—Neutral 4 3/8"
Depressed 3 3/8"
Lock and hinge stile cases . . . 9" x 2 1/4" x 1"

Using Standard Trim	Backset of O.S. Trim	Minimum Width of Stile
Single door using 1403J strike	*2 5/16"	*3 7/16"
Single door using 1405J strike (1405J in bronze only)	*1 3/4"	*2 3/8"
With Von Duprin removable mullion and 1403J strike	2 3/8"	3 1/2"

*When stop is 1/2"

SINGLE DOOR JAMB DETAIL

Strike adjusts for a 3/8" warpage of door.

Rim Devices for Single Doors or Double Doors with Mullion

Not reversible—specify hand; LHR or RHR.

Key locks thumbpiece

OUTSIDE TRIM	663NL	663DT	None	663TR
CYLINDER	3216 Rim	None	None	3216 Rim

The 663 series is the only outside trim available in stainless steel. Door is push-pull when crossbar is dogged.

Rim Device Installation for Double Doors

Removable mullion serves as stop for meeting stiles, covers gap between doors, and holds strikes for devices.

Use Von Duprin threshold (bronze or aluminum) for complete weather resistance.

VonDyke Exit Devices

TYPE 66 Mortise Vertical Rod

Companion devices to the rim type, the 66 mortise and vertical rod devices are the finest available—in every respect.

STAINLESS STEEL DEVICES (Finish US-32D)—Stainless steel used for all external parts, including sex bolts, 264U, 248L-4 and 300-L strikes, and 663 series outside trims. However, bronze, finish US-15, is used on the end plates of the top and bottom bolt cases, mortise locks and strikes, and all cylinders.

BRONZE DEVICES—All external parts are fashioned of bronze, including the sex bolts, strikes, outside trims and drop-forged lever arms.

ALL DEVICES—The master cam, bolts, latch case chassis, backplates, locking tumblers and springs are stainless steel; the lock and hinge stile chassis and rod members are drop-forged bronze.

Every 66 mortise and vertical rod device features reinforced crossbar, sex bolts for wood and kalamein doors, and rapid dogging—just a half turn of the key will dog the device . . . securely and rigidly.

On the vertical rod devices, a slight touch on the crossbar releases dead-locked top and bottom bolts. Additional movement of the crossbar or door causes bolts to pivot back into their cases. Automatic slide holds bolts retracted when door is open.

Standard, heavy-duty, drop-forged bronze locks and strikes are used on mortise lock devices.

Devices are *not* reversible—specify hand; LHR or RHR.

DIMENSIONS

Crossbar tubing	1" O.D.
Crossbar height from bottom of door	37"
Crossbar projection—Neutral	4 $\frac{3}{8}$ "
Depressed	3 $\frac{3}{8}$ "
Lock and hinge stile cases	9" x 2 $\frac{1}{4}$ " x 1"
Top and bottom bolt cases	5" x 2"
Vertical rods	$\frac{3}{8}$ " diameter

Automatic slide holds top and bottom pivoted dead bolts retracted when door is opened.

3216 Rim

3216 Rim

3215—1 1/4" Mort.

Split astragal must be used. For trouble-free meeting stiles, use Von Duprin 3246 metal astragal.

The 663 series is the only outside trim available in stainless steel. Doors are push-pull when crossbars are dogged.

*Can be furnished with NIGHT LATCH ACTION—lever operates only when key is used. Specify 6621NL.

†FNL and NL53 controls are bronze—furnished US-15 with stainless steel devices.

Accessories for Vertical Rod Installation

The Von Duprin 3246 metal astragal (bronze or aluminum) eliminates door gap.

Use Von Duprin LATCH-TRACK threshold (bronze or aluminum) for bottom bolting and complete weather resistance.

NEW!

NC and WDC devices now available in **stainless steel**! Check your representative, listed on page 8, for details.

NC Concealed device for doors $1\frac{3}{4}$ " thick, with $1\frac{3}{4}$ " (or more) hollow stiles, with inside dimension of at least $1\frac{3}{8}$ " x $1\frac{3}{8}$ ". All internal working parts of drop-forged bronze. Crossbar assembly bronze, or high tensile aluminum alloy in US-27 finish only. Lever arm drop-forged.

**WDC**

Concealed device for $1\frac{3}{4}$ " and $2\frac{1}{4}$ " solid core wood doors. All internal working parts of drop-forged bronze. Crossbar assembly bronze, or high tensile aluminum alloy in US-27 finish only. Lever arm drop-forged. Requires $\frac{5}{8}$ " x $1\frac{3}{4}$ " routing in edge of door. Adjustable edging (AL-302), with standard bevel, furnished when specified.

**27NC**

Exit only

**27NC-DT**

Push-pull when dogged

O.S. operation only when key is used

DIMENSIONS

Floating axles	$\frac{1}{4}$ " diameter
Crossbar tubing	1" O.D.
Crossbar height from bottom of door	.37"
Crossbar projection	Neutral $4\frac{1}{2}$ " Depressed $3\frac{1}{2}$ "
Lever arm brackets	1" x $7\frac{1}{2}$ "
Vertical rods (concealed)	$\frac{1}{4}$ " diameter
Top bolt	$\frac{1}{4}$ " square
Bottom bolt	$\frac{1}{4}$ " diameter

**27WDC**

Exit only

**27WDC-DT**

Push-pull when dogged

**27WDC-TL**

O.S. operation only when key is used

DIMENSIONS

All dimensions are identical to NC devices (above)

**Compensating Metal Astragal****3246—Extruded architectural bronze****AL3246—Extruded architectural aluminum**

For use on wood or metal doors equipped with two vertical rod devices or push and pull hardware. Easily adjusted for clearance between doors—overall adjustment is $\frac{5}{8}$ ". Permits independent operation of each door.

**"Latch-Track" Thresholds**

Extruded bronze—360, for wood
365, for metal

Extruded aluminum—AL360, for wood
AL365, for metal

5" wide. For installation where exterior level is $\frac{1}{2}$ " lower than interior floor. Write direct for dimensional details.

Von Duprin®

Fire and Panic EXIT DEVICES

● The Von Duprin line includes all grades of devices consistent with quality and lasting performance, a full range of styles and finishes, accessory items for the complete exit and a new series of push and pull hardware. Whatever your needs, specify Von Duprin—

"the safe way out!"

In addition to responsible Von Duprin builders hardware distributors across the nation, the factory representatives listed here are ready to help you plan the very best installation for your buildings.
